Objective

Experienced professional seeking to address business challenges by fostering synergy between business and technology.

Professional Experience

Frontend Developer, *BlazeBite*
Feb 2023 – present
Cleveland, OH

- Automate customer signup and collection of vendor information removing need for manual signup process.
- Develop UI to collect vendor information using Angular and Angular Material.
- Interface with Google Firebase to create customer accounts and store vender data.
- Participate in code reviews and contribute to feature design.

Senior EPM Consultant (SAP BPC), *Column5 Consulting*
Feb 2011 – Aug 2019
Scottsdale, AZ (travel / remote)

- Guided clients through enterprise performance management software implementations throughout the software development lifecycle, including requirements gathering, process evolution, development, training, testing, and maintenance.
- Led design and implementation process, overseeing and supporting other project team members, and collaborating best practices and standard approaches.
- Progressed from entry-level to senior within 3 years.
- Rescued failing projects after being brought in on late notice.
- Developed integration of master data and financial data, business logic, and reports using proprietary tools, SQL, table based calculation engines, and visual basic / MS Excel.
- Implemented financial models to help businesses:
  - Analyze the business to answer managerial questions (e.g., is the company adequately staffed to meet current and future objectives).
  - Decrease time to complete monthly and yearly reporting.
  - Improve clarity of financial forecasting and reporting.
- Mentored other consultants and provided training to users.
- Identified and mitigated project risks in collaboration with project management and stakeholders.
- Consulted and delivered solutions for a variety of industries including Insurance, Banking, Manufacturing, and Transportation.

Budget Analyst, *Babcock & Wilcox*
May 2007 – Feb 2011
Barberton, OH

- Developed, maintained, and supported departmental monthly and yearly reporting using MS Access, MS Excel, visual basic for applications, Hyperion, and SAP BPC.
- Developed automated reporting to flag incorrect sales orders saving 8 hours a month.

Projects

Workflow Manager, *Create and Deploy Workflows | React | Redux | Express | Node.js | MySQL*

- Define and create instances of workflows.
- Assign owners and dependencies to workflow tasks.
- Login sessions for managing owned workflows and tasks.
- RESTful API

myadventureproperties.com, *A short-term rental booking demo | React | Nextjs | MongoDB* ⧉

- Search for available properties by date and other attributes
- Geo search with autocomplete suggestions and proximity sorting

- Secure login for making and viewing reservations

prop-x, *Responsive properties for React components / TypeScript* ⎘
- A library for React components to pass and consume properties with values for each screen width.
- Retrieve property values in styled-components based on breakpoints.
- Optimize Next.js and other SSR and SSG applications by moving client logic to build time static site generation and server side rendering.

themeweaver, *Responsive Themes for React and StyledComponents / JavaScript*
- A library for creating themeable reusable React components.
- Generates responsive CSS based on developer provided theme configuration.
